DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Ito, Ohno, Harigaya ('346 and '592), and Horie.

All five references disclose a recording medium comprising a recording layer formed of Sb, Te, and Ga where the Ga content is from 2-10 at. %. The alloys may further contain Ge. The media all may further comprise two dielectric layers on either side of the recording layer, a reflective layer, and a third dielectric layer between the second dielectric layer and the reflective layer where the third dielectric material may be silicon nitride. See Horie paragraph [0080] and [0184-0197]. See '592 claims 1 and 9. See '346 claims 1-10. See Ohno claim 1 and col. 7-8. See Ito, col. 2-3.
